

Mission Commander Strategic

- Managing the allocation of frequencies and helping co-ordinate the efficient use of spectrum and minimising interference
- Simplifying the management of Encryption Keys – allowing the end users to easily operate and manage complex keys and the key database
- Performance monitoring – providing an easily understood unified interface that graphically illustrates system performance and highlights failures
- Secure video routing – superb easy to use interface allowing national level secure distribution of encrypted video to defined end-points
- Well defined permissions – allowing the definition of Users and Groups of Users that can only manage or monitor well defined sub-sets of the system

Features and Benefits:

- Network management
- Frequency and channel management
- Encryption key management
- Supports many simultaneous client workstations
- Hardware and software video wall management
- Easy to use mapping based interface
- Works with both online and offline maps
- Integrates with public & private networks
- Integrates with third-party IP cameras
- Tactical/strategic deployment and mobile missions
- Citywide surveillance infrastructures
- Full multi-server replication and fail-over

Overview:

Mission Commander Strategic (MCS) is an advanced client/server software suite that allows manual and automated configuration, management and integration of DTC video and IP transmission equipment and networked intelligent sensors. One or more servers will run many deployments with automatic backup and fail-over and many client workstations can connect to any of the deployments with full user authentication and access management control. Mission Commander Strategic will display and manage the geographical deployment of equipment, whether deployed for short missions or as part of a citywide surveillance infrastructure. It provides the vital information required to make informed realtime decisions.

The software can configure, monitor and automatically manage IP Mesh systems, Nugget ground sensor networks, audio, video and data transmitters, central/tactical receivers and networked video streams.

Mission Commander Strategic

Product Information:

Standard Licenses (included)

MCS-SER	Server (single), incl x 5 Client licences
MCS-SSERIN	Single Server Install, per site
MCS-MAINT	Server Maintenance, incl x 5 Client per annum

License Options

MCS-AES	AES Encryption Support
MCS-AESBCRYPT	AES and BCrypt Encryption Support
MCS-CMAP	Custom Regional Map File
MCS-MAP	Additional or Updated Map File
MCS-CL	Client License, x 10 Instances
MCS-CL1	Client License, x 1 Instance
MCS-CM	Client Maintenance per annum, x 10 Instances
MCS-CM1	Client Maintenance per annum, x 1 Instance
MCS-GATE-SER	Mission Commander Gateway per camera
MCS-GATE-SER-MAINT	Mission Commander Gateway maintenance per annum
MCS-MSERIN	Multi Server Install, per site

Video Wall Options

MCS-VW1DEC	Video wall, 1 decoder
MCS-VW4DEC	Video wall, 4 decoders

*Stream Converter Options

MCS-DSCVT	Dual Stream Converter Video Transcoder (x2 streams) Perpetual Licence
MCS-SCVT	Stream Converter Video Transcoder (x16 streams) Perpetual Licence
MCS-SCVT-1YR	Stream Converter Video Transcoder (x16 streams) 1-Year Licence
MCS-SCVT-3YR	Stream Converter Video Transcoder (x16 streams) 3-Year Licence
MCS-SSC	Standard Stream Converter (x32 streams) Perpetual Licence
MCS-SSC-1YR	Standard Stream Converter (x32 streams) 1-Year Licence
MCS-SSC-3YR	Standard Stream Converter (x32 streams) 3-Year Licence
MCS-SCVTMAINT	Stream Converter Video Transcoder Maintenance per annum
MCS-SSCMAINT	Standard Stream Converter Maintenance per annum

*see separate datasheet

Computer Requirements:

Server

Operating System	Windows 2008 R2 or newer, 64-bit
RAM	4GB

Client

Operating System	Windows 7 or newer, 64-bit
RAM	4GB

Encrypted products are subject to regulatory export controls
